Smooth & Woodgrain Fiberglass Entry Systems

FIBERGLASS REINFORCED DOOR SKINS **1**

Our exclusive formula is measured precisely to ensure each skin is produced to the highest quality. With unlimited design options, customized panel configurations are possible. The skins require little maintenance and will not splinter, dent, warp, rot, or rust. They can be painted, stained, and we provide a variety of graining options.

FULL LENGTH COMPOSITE STILES **2**

Our full-length composite stiles protect the door from external moisture to prevent warping or rotting. They have twice the screw-holding strength of wood.

COMPOSITE TOP & BOTTOM RAILS **3**

High strength composite top and bottom rails prevent moisture from seeping into the door and stops the buildup of mold.

EXTENDED LOCK BLOCK **4**

The full length LVL allows any type of lock to be placed for increased security.

POLYURETHANE FOAM CORE **5**

Our advanced CFC-free, high density, Polyurethane foam core enhances the door's soundproofing capabilities and provides insulation up to six times greater than wood doors.

BACKED BY WARRANTY

We are proud to offer one of the best warranties in the industry. Our products are held to high standards. We stand behind our products and guarantee the best quality to meet your performance expectations.

20 Minute Fire Rated Fiberglass Doors

Available in Woodgrain, Smooth, & Fir Grain Along with Shaker Style

Call for availability on all Styles, Sizes, and Lead Times

Perma-Door Premium Steel Doors... for strength, security & durability

Won't crack, warp, twist, or rot!
Unique all-steel edge perimeter
Excellent for use as "double door" system.
Insulated with an energy saving
core of polyurethane foam

Steel Edge Construction & Polyurethane Insulation

Choose from either an in or outward swing
All doors come fully equipped with Perma-Door's unique
adjustable 12-gauge hinge plate system
22-gauge hot-dipped galvanized steel & all-steel edge for
durability

Security Rating Grade 40

— Best in the Industry.

R-Value of 13

Ball-Bearing Hinges

— Standard on all Premium Series Doors

Protective Sill Covers

— Standard on all Premium Series Inswing Doors

Fire Rating

— Solid doors carry a 20 minute fire rating.

Unsurpassed Warranty

— All Perma-Door Premium Series Doors carry a
limited lifetime warranty.

Perma-Door Extra Features, Extra Benefits:

Highest Security Rating

All Perma-Door steel edge doors do not force open after 7 hits of a 100 lb. test weight for a Grade 40 Security Rating. The best in the industry.

A wood edge steel door cracks under force of one hit of a 100 lb test weight.

Composite Lock Block

Lock Block

- Uses a composite lock block for tremendous strength & security
- Full 4"x10" block has more screw holding power than wood
- Makes installation of locksets easy
- Remains flat around lock-block no distortion of door skin typically found with wood lock blocks.

Adjustable Hinges

Perma-Door Exclusive Hinge Plate

Perma-Door Pro Series Entry Door Systems

Pro-Series Steel Edge Door Features:

- 24-gauge hot-dipped galvanized steel for rust protection and durability.
- All-steel two-piece unitized construction - no wood to warp, bow or rot.
- Composite lock block for strength and easy installation of locksets.
- Polyurethane core completely fills the door - no foam voids plus R-value of 13, more than four times that of a wood door!
- 20-gauge fixed steel hinge reinforcements - keeps door from sagging.
- 4" residential hinges.
- Baked-on polyester primer accepts exterior grade latex paints.
- 20 minute fire rating on solid door.
- Ten-year limited warranty.

Steel Edge

Composite Lock Block

Factory Prefinished White Wood Edge Steel Doors

Factory Prefinished White Wood Edge Steel Doors

Durability: Top quality 24-gauge galvanized construction offers superior durability and tested performance.

Security: Solid 12" wood lock block reinforcement ensures that cylindrical hardware is mounted securely.

High Profile: Door features high definition embossment.

Wood Edge: Solid wood perimeter with J bend on steel provides strength.

Insulation: Polyurethane foam fully insulates the door behind the embossments.

Fire ratings: 20-minute fire rating.

Warranty: 10-year limited warranty.

Prime Wood Edge Steel Doors

- Durability:** Top quality 24-gauge galvanized construction offers superior durability and tested performance.
- Security:** Solid 12" wood lock block reinforcement ensures that cylindrical hardware is mounted securely.
- High Profile:** Door features high definition embossment.
- Wood Edge:** Solid wood perimeter with J bend on steel provides strength.
- Insulation:** Polyurethane foam fully insulates the door behind the embossments.
- Fire ratings:** 20-minute fire rating.
- Warranty:** 5-year limited warranty.

Introducing

DURA FRAME™

by: G-M Wood Products

The Natural Solution for rot-free door systems

Guaranteed for life against ground rot, decay and insect damage

- Superior paint adhesion
- Superior construction for long-lasting durability
- Superior value – It's economical

DURA-FRAME™ is:

Alaskan Yellow Cypress, one of the planet's most durable rot resistant woods, finger-jointed to the bottom of premium pine frame component. DURA-FRAME™ is end-sealed with DURA-SEAL™, and primer coated with DURA-PRIME™, G-M Wood Products' exclusive high-durability coatings, yielding exceptional value and rot-free performance. *It's environmentally responsible, renewable, and naturally rot-resistant...no chemicals added!*

Alaskan Yellow Cypress: One of the planet's most durable woods:

- Naturally resistant to rot & insect attack
 - Unique natural compounds make it highly resistant to decay, molds, fungus, termite and insect attack
 - Found in nature up to 1200 years old with over 60 growth rings per inch
- Exceptional physical properties
 - Incredible strength
 - Resistance to wear, splitting, and impact
 - Excellent nail and screw holding strength
- Superior Finishing qualities
 - Great paint and glue adhesion
 - Superior machining and sanding ability

Complete product offering

- Door Jambs
- Brick Mould
- Mull Posts
- Mull Casing
- Custom Components

All covered by DURA-FRAME™'s limited lifetime warranty

PF™ DOOR FRAMES

To have a complete entry system, it is important to consider the material of the door frame. Wood doors and frames are prone to warping, rotting, and cracking, while steel doors and frames can rust and dent. You don't want to install a door that will fail, nor do you want to install a frame that will fail.

Polyfiber (PF) Door Frames are a uniquely formulated and innovative alternative to traditional door frames. They combine the beauty of wood with the strength of steel. The material is durable, long-lasting, and is more thermally resistant than either wood or metal. The advanced system can be installed the same way as traditional wood frames with no added hassle. When used together with a fiberglass door, they create an enhanced, impenetrable entryway.

FEATURES & BENEFITS

- Equipped with HydroShield technology, it will not absorb or wick moisture, and prevents warping, rotting, and splitting.
- Frame is not able to be infested with termites at any point along the structure.
- Has twice the screw holding power of traditional wood door frames.
- More versatility in design. Available in various lengths and widths that can be stained as well as painted.
- Maintenance free and energy efficient.

FRAME DECAY COMPARISON

PF™ DOOR FRAME

Ultimate Multi-Point Astragal (MPA)

Multi-Point Sealing Power Without the Multi-Point Price Tag.

Protect your home and eliminate traditional double-door performance challenges with the one of a kind Multi-Point Astragal. MPA delivers the sealing power of a multi-point lock without the multi-point price tag—Multi-point functionality is built right into the astragal and even works with standard deadbolt packages for ultimate cost-efficiency. Plus, MPA automatically forms a custom seal against the sill cap, even if conditions aren't perfect, saving time and eliminating costly service calls. Beyond delivering improved performance, MPA is easy to use, providing Enhanced Accessibility for a product homeowners will love.

FOR DOUBLE DOORS ONLY!

How the Multi-Point Astragal Works

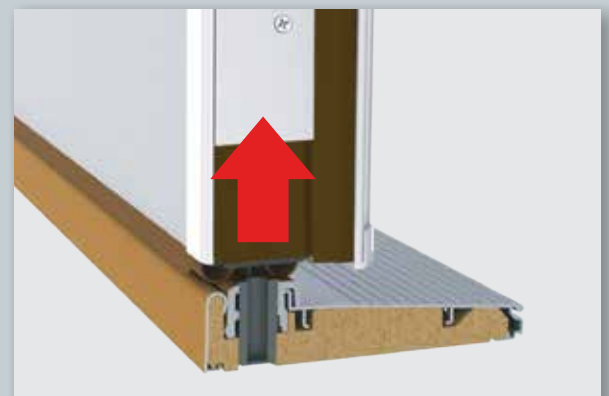

Engaging the deadbolt activates the built-in locking mechanism.

Built-in Lock Pawls engage with keepers in the active door.

Flip Lever locks and unlocks the astragal in one easy motion.

Flush Bolt and Floating Boot lift clear of the sill for damage-free operation.

Fiberglass Knotty Alder & Rustic Series Doors

Discover the difference with brand new door options.

Knotty Alder fiberglass entrance doors are engineered for durability and longevity while replicating the look and texture of real wood doors.

- Constructed of deep-profile fiberglass reinforced skins with stronger dimensions and crisper shadow lines.
- The high-impact compression molded skins are engineered not to crack, splinter, rust, warp, rot or delaminate.
- Full-length 3 1/2" LVL stiles and 1" top/bottom rails
- Square 1/2" Alaskan Yellow Cypress edges give a true wood door appearance and are rot resistant.
- Environmentally-friendly polyurethane core.
- Available in 6-8, 7-0 and 8-0 heights, hinged left or right.
- Limited Lifetime Warranty.

New Construction Patio Units Available in Steel, Smooth Fiberglass and Woodgrain Fiberglass

Features & Benefits

- Premium composite adjustable sill.
- Rolling screen (white or sand).
- Q-Lon® weather-strip provides a superior seal.
- Limited lifetime warranty on woodgrain fiberglass.
- 25-year warranty on smooth fiberglass.
- 10-year warranty on steel units.
- See price pages for availability of doors.

Steel and Fiberglass Remodel Size Patio Units

Features & Benefits

- Unit down size to fit into existing aluminum or vinyl sliders.
- Premium composite adjustable sill.
- Rolling screen (white or sand).
- Q-Lon® weather-strip provides a superior seal.
- 10-year warranty on steel units.
- 25-year warranty on smooth fiberglass.
- Limited lifetime warranty on woodgrain fiberglass.
- See price pages for availability of doors.

Opticks Privacy Glass

Opticks textured glass is a great option to meet both light and privacy needs. Nine textures run the gamut from nature-inspired, tranquil textures to contemporary textures that are both dramatic and subtle. Common among all nine Opticks doorglass patterns is the beautiful way light retracts and diffuses off the textures. Opticks will let light in, preserve privacy, and add character to a home. Available in a wide range of door and side lite sizes and energy-efficient low-E glass.

When It's Time to Replace the Old and Welcome the New ...

The first thing people notice about any house is the front door.

What does your door say about you?

Welcome to the Homeowners Remodeler Series of replacement doors from Perma-Door.

- Choose from dozens of doors with Wall-Vern's Decorative Lites Collections for a beautiful new entrance.
- Enjoy great security with steel framed doors that surpass the most stringent forced entry tests.
- Benefit from the energy-saving advantage of Q-Lon weather-stripping and adjustable threshold.
- These top quality replacement doors are engineered to fit over your existing wood door frame.
- Perma-Door's exclusive adjustable hinge system ensures a perfect fit every time.
- 22-gauge hot-dipped galvanized steel & all-steel edge for durability.

Replacement Door Measurements

2'11"x 6'7"	35-5/8"	36-1/2"	80"	80-1/2"

Replacement Door Diagrams

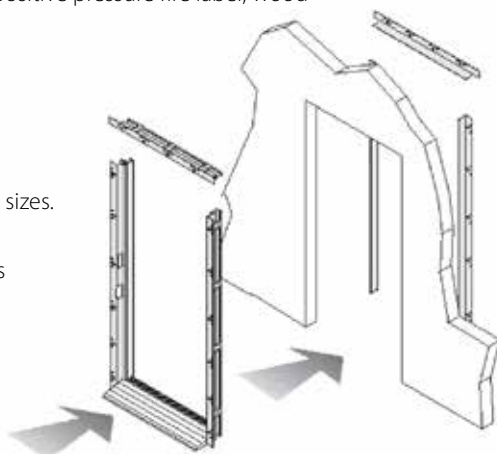

Featuring Perma-Door Steel Edge Door & The Fitted Frame™ 90-Minute Adjustable Steel Frame

Fitted Frame with Kerfed Weatherstripping

Fitted Frame™ is an adjustable throat steel door frame designed for prehung applications. It's designed for residential, new or remodeling construction, and for light commercial applications.

- 4-1/2" to 8-1/2" wall sizes (1" adjustment).
- 5/8" stop height.
- Galvanized (A-40) steel per ASTM-653.
- Prepped with anchoring holes with vision slot for wood casing.
- Embossed 90 minute neutral or positive pressure fire label; wood or steel stud. See fire ratings.
- Base Kit - 18 gauge
- Trim Kit -
22 gauge for 4-1/2" to 5-1/2" and
5-1/2" to 6-1/2" wall size
18 gauge for 6-1/2" to 8-1/2" wall sizes.
- All frames are white in color
- 6'8" inswing and handicap frames
- Available in four wall sizes -
4-1/2" to 5-1/2"
5-1/2" to 6-1/2"
6-1/2" to 7-1/2"
7-1/2" to 8-1/2"
- Inswing handicap frames include a 1/2" x 5" handicap aluminum threshold.
- 1-1/2" prefinished white steel casing available.
- Includes Kerf-style being foam weatherstrip.

Perma-Door Features:

- All steel edge construction for strength and durability.
- 22-gauge galvanized steel for excellent rust prevention.
- Solid polyurethane foam core with an R-value of 13.0.
- Doors are available with a maximum 90 minute fire rating, both positive and neutral pressure. Available up to 3'0" x 8'0".
- UL10C and UL 10B code compliance.
- Handicap ADA threshold.

Fitted Frame Steel Frame Features:

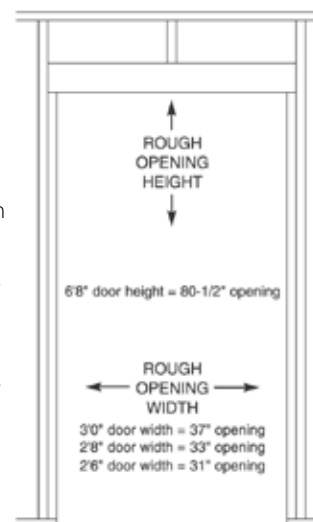

- Two-piece construction for adjustability and easy installation.
- Frames are available with a maximum 90-minute fire rating, both positive and neutral pressure. Available up to 3'0" x 8'0".
- UL10C and UL 10B code compliance.
- Optional prefinished white steel casing available.

Fitted Frame Hurricane Resistant Testing:

- Test Standards - ASTM 1886, ASTM 1996, DADETAS201, DADETAS202, DADETAS 203.
- Tested to - DP +66.0 psf / -66.0 psf.

To protect what you value most - the Perma-Door's steel edge entry doors carry a maximum 90 minute fire rating. Perma-Doors can be prehung in a 90-minute Fitted Frame adjustable steel frame, which installs easily into varying wall thicknesses. The steel frame is a two-piece construction, consisting of a base and a trim frame.

The prehung door with base attachments is installed in the opening. The closure frame is then attached from the opposite side. Optional wood trim is then nailed in place. Steel trim is fastened with clips. For ease of installation and the industry's highest fire and security rating, choose the Perma-Door steel edge door and the Fitted Frame adjustable steel frame.

* = If using 12"sidelite, subtract 2"from the opening width for a single sidelite, and 4" for double sidelites.

** = Brick dimension is measured from outside edge of brickmold on door unit.

NOTE: For swing-out doors, subtract 1/2" from rough opening height

NOTE: Subtract 3/4" from rough opening width and 3/8" from height for actual unit size.
