

WESTERN *Reflections*

2021 Distribution Catalog

Our products turn a house into someone's home.

A front door is a home's concierge. It says welcome to guests and welcome home to its occupants. It adds a touch of charm and hospitality. A front door reflects a homeowner's style, complements a home's architecture, and adds curb appeal.

Western Reflections makes high-quality doorlites—from decorative doorglass and injection-molded frames to privacy glass and blinds between glass—that add value to the home.

Our position as an industry leader is the result of our belief that customers always come first. We listen to them, foster relationships with them, and work hard to honor the special relationship they have with their homes.

Exceptional service characterizes Western Reflections. Our customer service team is consistently named among the best in the industry. They know our products down to the smallest detail. And they know what matters to our customers. The voice of our customers is reflected in our exceptional lead times, on-time shipments, doorglass designs, and price options.

Innovative products also characterize Western Reflections. Our designers, engineers, marketers, and manufacturing associates offer their talents and fresh ideas to better the company and the products we make. We recently added **Affluent**, a contemporary design inspired by free-flowing water, and we are excited to be adding **Mistify** this year. Mistify, a unique combination of pattern and texture, is available as a 1-lite as well as black grilles between glass.

Our Catalog+ has everything you need.

Go to **Western-Reflections.com/catalog** to view our interactive Full Line catalog with the latest pricing, videos and so much more.

Meet ZEEL®

A minimal design with endless opportunities.

ZEEL is a sleek, versatile frame designed to be stained or painted that blends seamlessly into the entry door, allowing the doorglass to take center stage. This **clean, low-profile look** offers an alternative to flush glazed doors that provides the benefits of a frame system with the style homeowners desire.

Traditional frames can warp when subject to severe temperature changes or direct sunlight exposure, especially when painted dark colors.

FiberMate Plus® is our strongest material yet and exceeds performance expectations in extreme environments.

Resolve® sealant is immune to squeeze out and doesn't degrade over time, reducing service calls and warranty issues. This clean thermoset foam seal can be repositioned and stays consistent over time.

ZEEL eliminates the need for screws and cumbersome screw hole covers with an innovative clip system. This allows each frame to sit flush, streamlining installation and greatly reducing installation time and effort. This efficient installation offers an alternative to costly flush glazed doors.

SAVE MONEY AND REDUCE INVENTORY

SAVE TIME AND EFFORT WITH NO SCREWS

Catalog Symbols

Low-E energy efficient glass.

Low-E Plus for regions requiring higher performance.

Severe Weather/Impact doorglass.

Gray Turtle Glass available in the Severe Weather/Impact product line.

Simulated Divided Lite

STC >30 Doorglass shown with this icon has a Sound Transmission Class rating above 30 and offers enhanced noise reduction when used with a STC rated door.

Select Western Reflections doorglass can be used in ENERGY STAR® qualified doors to help meet ENERGY STAR® specifications.

Severe Weather/Impact Doorglass

Western Reflections Severe Weather doorglass is designed for hurricane-rated doors.

Each option is designed to provide protection from damaging wind, water infiltration, eliminate the need for hurricane shutters and suit your style and functional needs.

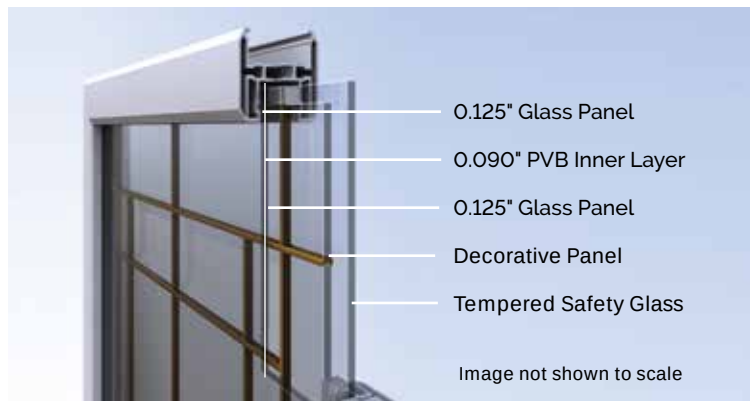

Look for this symbol throughout this catalog

Our Severe Weather Products Meet the Following Requirements:

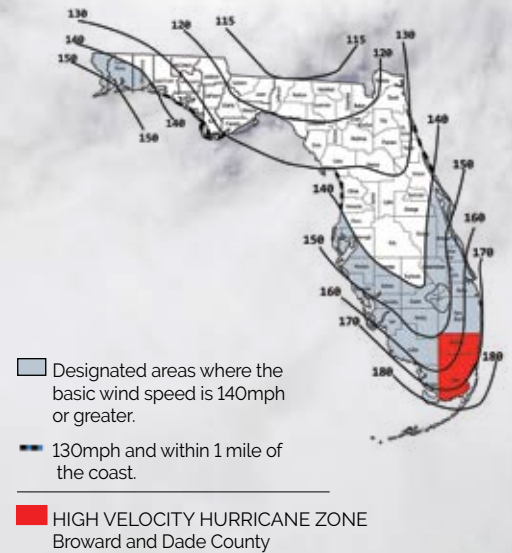

- Wind-borne debris regions or high velocity hurricane zones (HVHZ)
- Design Pressure (DP) $\pm$ 66 psf
- Wind and missile impact code requirements
- Texas Department of Insurance codes
- Florida Building Commission codes
- Product certification information available under FBC approval FL14935.1, FL14935.2, FL14935.3, FL14935.4
- Provides up to 30% more suppression of outside noise than standard doorglass
- Gray Turtle Glass meets coastal light transmittance code requirements in sea turtle nesting areas (see pg 127)

Dialogue Layered Glass®

CLICK HERE TO WATCH

Designers Ayako Takase
and Cutter Hutton

Playful interaction and dynamic privacy

Dialogue takes on a personality of its own as layers of glass interact with one another, with light, and with movement. Each of the line's six ceramic frit patterns change form and move as light or a person's vantage point changes. Patterns come to life, shapes are revealed, and shadows dance as light and movement engage in a dialogue with the glass. Dialogue layered glass creates dynamic privacy that changes, just as the doorglass patterns do, with light and proximity.

Subtle beauty and a surprising twist

Dialogue complements a range of architectural styles and design aesthetics with doorglass patterns offering privacy and translucence. Ayako Takase and Cutter Hutton, principals of industrial design firm Observatory, created each of Dialogue's designs with a subtle pattern on the outer glass layer that allows the home's architecture to take center stage while the interior layer features a bolder, pronounced pattern.

Opticks textured glass is a great option to meet both light and privacy needs. Eight textures run the gamut from nature-inspired, tranquil textures to contemporary textures that are both dramatic and subtle. Common among all eight Opticks doorglass patterns is the beautiful way light refracts and diffuses off the textures.

Available in a wide range of door and side lite sizes and energy-efficient low-E glass, Opticks will let light in, preserve privacy, and add character to a home.

Spotlights® Doorglass

Authentic Design for the Architecture Enthusiast™

Trends come and go. Good design lasts. As do good memories. Of homes you grew up in. Of architectural styles you've admired. Spotlights® doorglass, from Western Reflections, celebrates the best of your design history.

Put the spotlight on... your style, your price, your architectural expression, your entry door, your home.

Because you're inspired by your home's architecture or the vision of the one you're building, Spotlights doorglass is for you. It's the finishing touch for the discerning homeowner who appreciates architecture and the spirit of good design.

5 Sizes. 7 Glass Options. Countless Configurations. Endless Customization.

Spotlights® gives you options that make it easier to meet your renovation and construction goals. Five doorglass sizes and seven glass options give you flexibility to create a unique look that complements the architecture of your home. Small and large glass sizes, horizontal and vertical shapes, and choices for the number, orientation, and type of glass give you plenty of flexibility for exactly the style, privacy, and price you desire.

Keep It Real

Spotlights are true to the character of your home's aesthetics. Chinchilla, Circuit, Clear, Clear Low-E, Cubed, Frosted and Rain glass and an architecturally authentic modern frame profile create the minimalist aesthetic and functional attributes you're wanting in your home.

The textured grain in Spotlights' frames is reminiscent of classic mid-century maple and birch furniture. The uniform and subtle grain provides a perfect surface for paint or stain.

Heighten the Performance

Spotlights® is constructed with performance features that style-savvy homeowners look for. Spotlights' **FiberMate® molded and textured frame** works equally well for painting or staining. FiberMate's material formulation out performs lesser quality frames: the frame's construction resists both warping and deformation from heat buildup and can be used with dark finishes.

Spotlights' **compression foam tape seal** construction eliminates the oozing and sticky mess of wet caulk products. The frame seal's design is also engineered to extend the life of your door frame. If damaged doorglass needs to be replaced, you can do so without having to replace the frame as well. The modern Spotlights frame with compression foam tape seal is removed from the door, damaged glass repaired or replaced, and the frame reinstalled. Insulated glass and a well-constructed frame unit make Spotlights energy efficient.

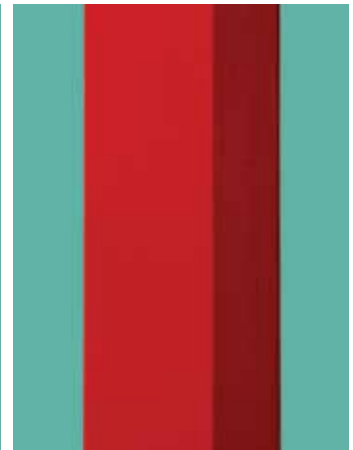

Seated screw hole covers allow for easy alignment and match the frame's grain direction, resulting in a uniform, finished aesthetic.

Spotlights® Glass Details

Chinchilla (CHA)

As touchable as its namesake, Chinchilla's fine lines and organic, fur-like texture create a striking wave pattern when seen from afar.

Privacy Rating: 9.

Circuit (CCT)

Mid-century Modern, Art Deco, and Contemporary all left their imprint on Circuit glass. Its eclectic styling with silkscreen glass and clear design elements suits a range of architectural home styles. Privacy Rating: 8.

Clear (CL)

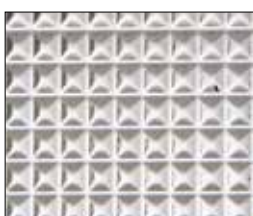

Clear glass stands the test of time when it comes to architectural styles and puts a focus on inside and outside views.

Privacy Rating: 0.

Clear Low-E (CL-LE)

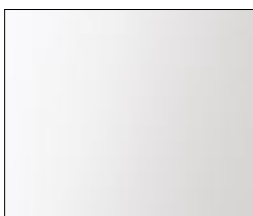

Low-E glass puts the spotlight on performance. It keeps the cold air out in the winter and warm air out in the summer and reduces UV rays and the fading of wall coverings and fabrics they cause. Privacy Rating: 0.

Cubed (CU)

Cubed glass brings to life the symmetry and geometric patterns found in the architecture of the 1920s and 1930s. Grid patterns, glass blocks, and structure are celebrated in this glass style.

Privacy Rating: 9.

Frosted (FSB)

Frosted glass blends privacy with natural light, something that will find itself at home in any architectural style.

Privacy Rating: 9.

Rain (RN)

All that's missing is the patter of raindrops. Rain features a vertical pattern and textured surface that create the illusion of rain trickling down a window. Privacy Rating: 9.
