

WESTERN
Reflections

2023 Distribution Catalog

Home.

A home is so much more than a blueprint and materials. It is a place to make memories, rest and be with friends and family. The entryway sets the tone when we return home and when the people we love come to visit. An updated front door can add style and value to a home.

Western Reflections makes high-quality doorlites, from decorative doorglass and injection-molded frames to high-privacy textures and blinds between glass. Our position as an industry leader is the result of our belief that customers always come first. We listen to you, foster relationships with you, and work hard to honor the special connection you have with your home.

Exceptional service characterizes Western Reflections. Our customer service team is consistently named among the best in the industry. They know our products down to the smallest detail and they know what matters to our customers. The voice of our customers is reflected in our exceptional lead times, on-time shipments, product selections and price options.

Innovative products also characterize what we do at Western Reflections. Everyone here contributes fresh ideas that better the company and the products we make. We continue to invest in innovations, such as our **ZEEL® Frame** by adding 6 new sizes. Our new **ADA Frame** has two sizes that accommodate the required 10-inch clearance. We will be adding new GBG configurations to the ADA offering throughout 2023. Based on customer demand, we have expanded our **Vapor** textured glass offering by adding it to our popular SDL sizes.

Edgewood is a new geometric design brimming with personality, with top-to-bottom class and just a touch of drama. Patina caming and four square bevels provide a gem-like border that surround streamed textured glass for maximum privacy. The new Doodle etched glass adds the final touch of interest for a doorglass design that welcomes you home.

Our Catalog+ has everything you need.

Meet ZEEL®

A minimal design with endless opportunities.

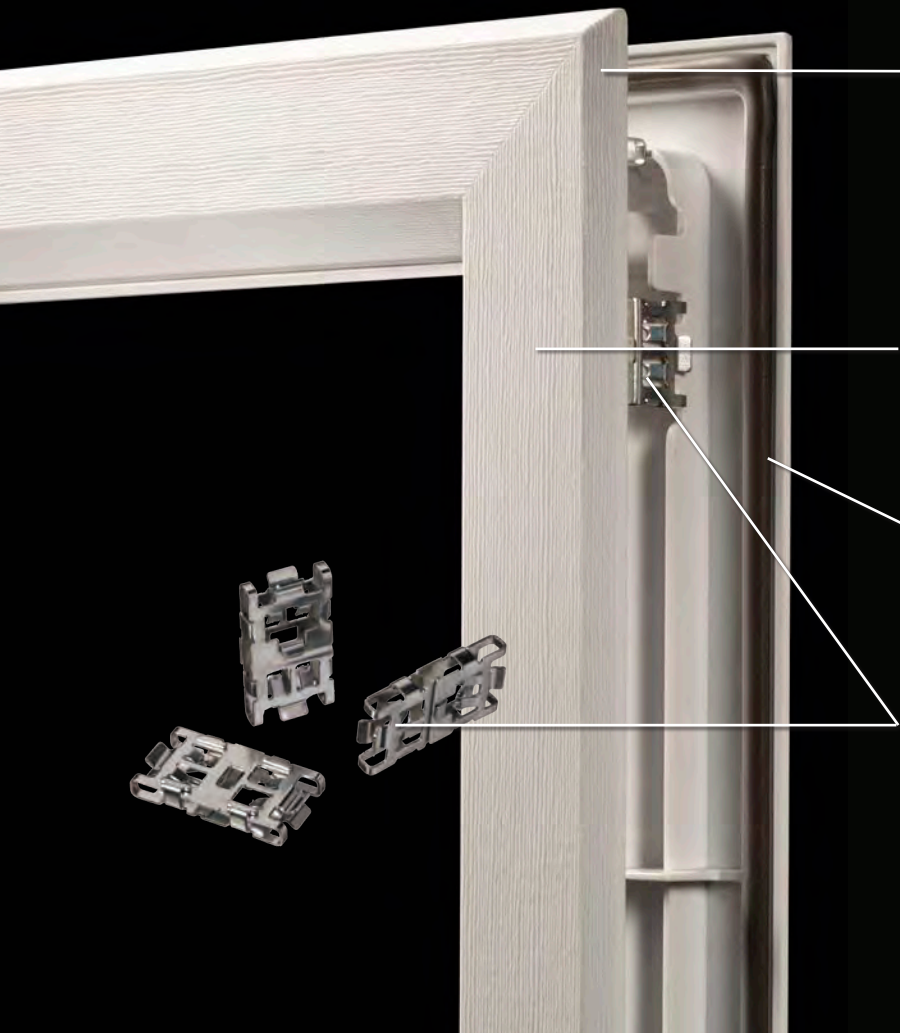

ZEEL is a sleek, versatile frame designed to be stained or painted that blends seamlessly into the entry door, allowing the doorglass to take center stage. This **clean, low-profile look** offers an alternative to flush glazed doors that provides the benefits of a frame system with the style homeowners desire.

Traditional frames can warp when subject to severe temperature changes or direct sunlight exposure, especially when painted dark colors.

FiberMate Plus® is our strongest material yet and exceeds performance expectations in extreme environments.

Resolve® sealant is immune to squeeze out and doesn't degrade over time, reducing service calls and warranty issues. This clean thermoset foam seal can be repositioned and stays consistent over time.

ZEEL eliminates the need for screws and cumbersome screw hole covers with an innovative clip system. This allows each frame to sit flush, streamlining installation and greatly reducing installation time and effort. This efficient installation offers an alternative to costly flush glazed doors.

Doorglass Privacy

As Western Reflections continues to add a variety of doorglass designs with different types of glass, our customers are asking questions about how we determine our privacy levels.

With no industry standard, every manufacturer is free to determine what the opacity or privacy level is for their doorglass. We are pleased to announce that we are leading the way with a standard test using a spectrophotometer to produce an objective number for every glass, every time.

We've removed the confusion of arbitrary numbers, simplified our privacy levels to four categories and we now show visual examples for each level of privacy. See for yourself, go to western-reflections.com/catalog.

Simulated Divided Lite

STC >30 Doorglass shown with this icon has a Sound Transmission Class rating above 30 and offers enhanced noise reduction when used with a STC rated door

Severe Weather/Impact Doorglass

Western Reflections Severe Weather doorglass is designed for hurricane-rated doors.

Each option is designed to provide protection from damaging wind, water infiltration, eliminate the need for hurricane shutters and suit your style and functional needs.

Look for this symbol throughout this catalog

Our Severe Weather Products Meet the Following Requirements:

- Wind-borne debris regions or high velocity hurricane zones (HVHZ) when installed in a proper entrance.
- Design Pressure (DP) \pm 66 psf, per Florida Component Approval FL14935
- Wind and missile impact code requirements
- Texas Department of Insurance codes
- Florida Building Commission codes
- Product certification information available under Florida Building Commission FBC approval FL14935.1, FL14935.2, FL14935.3, FL14935.4
- Provides up to 30% more suppression of outside noise than standard doorglass
- Gray Turtle Glass meets coastal light transmittance code requirements in sea turtle nesting areas (see pg 113)

Spotlights® Doorglass

Authentic Design for the Architecture Enthusiast™

Trends come and go. Good design lasts. As do good memories. Of homes you grew up in. Of architectural styles you've admired. Spotlights® doorglass, from Western Reflections, celebrates the best of your design history.

Put the spotlight on... your style, your price, your architectural expression, your entry door, your home.

Because you're inspired by your home's architecture or the vision of the one you're building, Spotlights doorglass is for you. It's the finishing touch for the discerning homeowner who appreciates architecture and the spirit of good design.

5 Sizes. 9 Glass Options. Countless Configurations. Endless Customization.

Spotlights® gives you options that make it easier to meet your renovation and construction goals. Five doorglass sizes and nine glass options give you flexibility to create a unique look that complements the architecture of your home. Small and large glass sizes, horizontal and vertical shapes, and choices for the number, orientation, and type of glass give you plenty of flexibility for exactly the style, privacy, and price you desire.

Keep It Real

Spotlights are true to the character of your home's aesthetics. Celebration Earth, Celebration Ocean, Chinchilla, Circuit, Clear, Clear Low-E, Cubed, Frosted and Rain glass and an architecturally authentic modern frame profile create the minimalist aesthetic and functional attributes you're wanting in your home.

The textured grain in Spotlights' frames is reminiscent of classic mid-century maple and birch furniture. The uniform and subtle grain provides a perfect surface for paint or stain.

Heighten the Performance

Spotlights is constructed with performance features that style-savvy homeowners look for. Spotlights' **FiberMate® molded and textured** frame works equally well for painting or staining. FiberMate's material formulation outperforms lesser quality frames: the frame's construction resists both warping and deformation from heat buildup and can be used with dark finishes.

Spotlights' **compression foam tape seal** construction eliminates the oozing and sticky mess of wet caulk products. The frame seal's design is also engineered to extend the life of your door frame. If damaged doorglass needs to be replaced, you can do so without having to replace the frame as well. The modern Spotlights frame with compression foam tape seal is removed from the door, damaged glass repaired or replaced, and the frame reinstalled. Insulated glass and a well-constructed frame unit make Spotlights energy efficient.

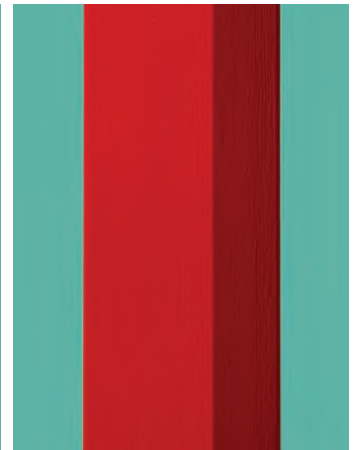

Seated screw hole covers allow for easy alignment and match the frame's grain direction, resulting in a uniform, finished aesthetic.

Opticks textured glass is a great option to meet both light and privacy needs. Eight textures run the gamut from nature-inspired, tranquil textures to contemporary textures that are both dramatic and subtle. Common among all eight Opticks doorglass patterns is the beautiful way light refracts and diffuses off the textures.

Available in a wide range of door and side lite sizes and energy-efficient low-E glass, Opticks offers a range of privacy options while letting light in to add character to your home.

Form and function are the common denominators among our Everyday Collection of craftsman doorlites, clear doorlites, enclosed blinds, grilles between glass and ventlites. Homeowners are sure to find the style, finish, and function needed for their entry, side, porch, and patio doors.

blink®

ENTRY DOORGLASS

WATCH THE VIDEO
blinkblinds.com/doorglass

THE BEST-SELLING BLINDS BETWEEN GLASS

Blink® Entry Doorglass brings an updated look, feel and finish to your entryway while keeping the same benefits of maintenance-free light and privacy control of enclosed blinds. This latest design combines easy operating effort and long-lasting reliability that continues our 20-year history of building the best-selling blinds between glass in the industry.

Light and Privacy Control

Whether you're looking to enjoy the outdoors or need to turn off the outside world, the perfect levels of light and privacy are yours to control. Our superior **EasyGlide** System allows our blinds to tilt completely closed, keeping you safe from prying eyes and unwanted light. The full privacy channels eliminate light gaps, shadows, and sunlight glare.

Easy to Operate

The levels of light and privacy in your home are yours to control using our **EasyGlide** Operator which slides along the **Ergo Track** using **Sure Connect Magnets**. The ergonomically placed operator lets you raise, lower and tilt your blinds the entire length of the doorglass with only the slightest movement. No reaching or stooping is needed to adjust the blinds. An innovative design results in stacked blinds that take up the smallest of space at the top of the doorglass when fully opened.

Low Maintenance

Since our blinds are enclosed between two panels of glass, you never need to dust which decreases allergens in your home. Even with repeated use, our enclosed blinds retain their new look—unlike exposed blinds that can become bent or tangled over time. Blink Entry Doorglass carries a 20-year warranty on blinds, glass seal and operator for a long-term performance in your exterior door.

Safety

Blink is leading the industry in enclosed blinds that reduce the safety risk for children and pets. With no dangling cords, our blinds have received two certifications from the Window Covering Manufacturers Association and Parents for Window Blind Safety. Both organizations strongly urge parents to use window coverings without accessible cords in homes with children. In addition, all our enclosed blinds are offered in tempered safety glass.

Attention to Detail

We prioritized style and design by offering six colors and paid attention to aesthetic details, such as covering the cords with a bottom rail and matching all the visible components so the colors of your entry door blinds will always coordinate with your décor. Choose from an **Evolve®**, **ZEEL®** or **Severe Weather** doorglass frame* to complement your home's architecture, whatever the style.

Visit blinkblinds.com/doorglass for more info.
