Section Detail

SECTION DETAIL 324S panels are produced in stucco texture for microgroove design or woodgrain texture for flush and raised panel design. The door panels are prepared inside and out to offer maximum protection to provide you with a long-lasting surface finish and reduced maintenance cost.

The Industry Leader in Innovative Door Choice and Quality

Between Section Seals **1**

Special heavy-duty material that acts as a gasket between sections to reduce the air infiltration while further enhancing the insulation properties.

FingerGuard™ Pinch-resistant **2** Section Joints

Prevent fingers from getting caught between the door sections reduces the risk of injuries which may result in worker's compensation claims.

Sandwich Construction **3**

3-layer steel front and back construction with insulating polystyrene core increases energy savings.

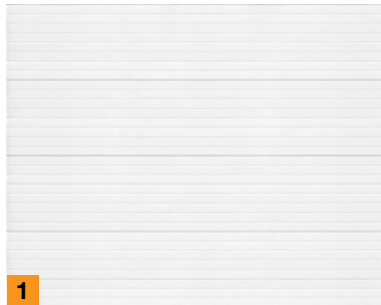

Bottom Weather Seal **4**

Keeps out wind, rain, debris and other elements for added energy savings.

Panel Surface Treatment **5**

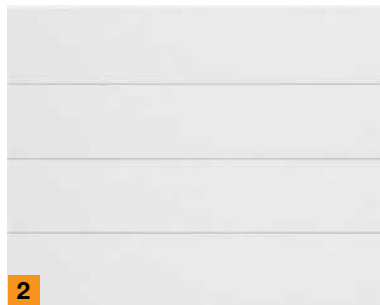

Galvanized finished painted steel provides superior corrosion resistance for years of trouble-free performance.
